Results and Interpretation

- **Intelligibility Rating** is based on the examiner's judgment of the participant's speech clarity in conversational speech.
- **Score** reflects the number of correct productions out of the total number of sounds tested.
- **Severity** is determined by comparing the score to age-appropriate norms, where:
 - **Severe:** Significantly below age expectations, with a profound impact on intelligibility.
 - **Moderate:** Below age expectations, with a noticeable impact on intelligibility.
 - **Mild:** Slightly below age expectations, with minimal impact on intelligibility.
 - **Age Appropriate:** Within the normal range for the individual's age group.

Test Type	Intelligibility Rating	Score	Severity
Full Test Screener	<ul style="list-style-type: none">• Good - more than 90% of words can be clearly understood• Fair - 60-90% of words can be clearly understood• Poor - less than 60% of words can be clearly understood <p>Typically, a child is understandable at or above these levels:</p> <ul style="list-style-type: none">• 50% by 2 years of age• 75% by 3 years of age• 100% by 4 years of age	/ (%)	Severe Moderate Mild Age appropriate

Position in Words	Sound Errors Marked	Interpretation

Error Analysis

- Document each type of error observed during the test.
- Provide examples for clarity.
- Note the age by which the error should typically be eliminated, based on developmental norms.
- Calculate the percentage of each error type out of the total number of errors to identify predominant patterns.
- Interpretation should offer insights into the nature of the speech sound disorder and guide intervention planning.
