**Disclaimer:** This workout plan is a general guide and NOT a substitute for personalized training advice. Always consult with a qualified fitness professional or healthcare provider before starting any new exercise program, especially if you have pre-existing medical conditions, injuries, or concerns. Listen to your body and modify exercises as needed to ensure your safety.

Additional tips for success	
<ul style="list-style-type: none"> <li>• <b>Consistency is key</b> Stick to the plan and aim to complete all 4 workouts each week. Progress comes from regular effort over time.</li> <li>• <b>Prioritize proper form</b> Focus on mastering the correct technique before increasing weights. Proper form not only ensures better results but also reduces the risk of injury.</li> <li>• <b>Start with manageable eights</b> Choose a weight that challenges you but allows you to complete all reps with good form. Gradually increase the weight as exercises become easier.</li> <li>• <b>Stay hydrated</b> Drink water before, during, and after your workout to keep your body functioning optimally.</li> <li>• <b>Fuel your body</b> Pair your workouts with a balanced diet rich in protein, complex carbs, and healthy fats to support muscle recovery and overall energy.</li> <li>• <b>Rest and recovery</b> Ensure you get 7–8 hours of sleep per night and allow for rest days between workouts to let your muscles recover and grow.</li> </ul>	<ul style="list-style-type: none"> <li>• <b>Track your progress</b> Keep a log of the weights, reps, and sets you complete. This will help you monitor your progress and motivate you to keep improving.</li> <li>• <b>Set realistic goals</b> Focus on small, achievable milestones like increasing reps, improving form, or lifting slightly heavier weights. Celebrate your progress along the way!</li> <li>• <b>Warm up and cool down</b> Don't skip the warm-up or cool-down. Properly preparing your body prevents injuries, and stretching afterward improves flexibility and recovery.</li> <li>• <b>Ask for help</b> If you're unsure how to use a machine or perform an exercise, don't hesitate to ask a gym trainer or staff member for guidance</li> </ul>
