Body Dysmorphic Disorder Worksheet

vame:	_ Date:
Age:	Practitioner:
Body dysmorphic disorder (BDD) is a mental health one or more perceived defects or flaws in their appentance.	condition where a person can't stop thinking about arance, which may be minor or not observable to
In your own words, how would you describe Bl	DD?
List any areas of your appearance you are condas the flaw or defect.	erned about, and describe what you perceive
BDD thoughts and behaviors	
Record any BDD-related thoughts and the situa	tion in which they occur in.
Identify any behaviors or rituals you engage in mention their frequency and highlight their trigg	

Challenging BDD thoughts

A cognitive distortion is a biased or irrational thought pattern that reinforces negative beliefs. These distorted thinking patterns can contribute to emotional distress and behaviors like anxiety or depression.

Examples include overgeneralization, catastrophizing, and all-or-nothing thinking. Identifying and challenging cognitive distortions is key to improving mental well-being.

Look at your BDD thoughts and identify any cognitive distortions.	
For each cognitive distortion, try refreming it in a more belonged way	
For each cognitive distortion, try reframing it in a more balanced way.
