Carepatron AI Consent Form

Effective date:
This notice describes how Carepatron's Al-powered tools assist in the documentation of healthcare services at,
how your data is protected, and your rights regarding the use of Al-assisted tools. Please read this notice carefully and ask any questions before signing.
Al use in healthcare documentation
At, we use
Carepatron's AI scribe to support medical documentation. This tool helps transcribe conversations, summarize clinical notes, and assist with administrative tasks. It is designed to enhance efficiency and accuracy while allowing healthcare providers to focus on patient care. However, Carepatron's AI scribe does not replace human medical expertise or clinical judgment.
All Al-generated notes are reviewed by a licensed healthcare provider before being added to your medical record. Carepatron's Al tools are intended solely for documentation and administrative support

How Carepatron Al handles your information

Carepatron's Al-assisted documentation processes protected health information (PHI) in compliance with strict privacy and security standards. We are committed to keeping your data private and secure through the following measures:

- **HIPAA compliance**: Carepatron follows the Health Insurance Portability and Accountability Act (HIPAA) and all other relevant data protection laws.
- Secure encryption and access controls: We implement data encryption and restricted access policies to prevent unauthorized viewing or sharing of your PHI.
- **Limited Al access**: Al-generated documentation is accessible only to authorized healthcare professionals who are responsible for reviewing and verifying records.
- No third-party sharing: Your health information will never be sold, shared, or used for marketing purposes without your explicit consent.

Potential risks and limitations of Al documentation

While Carepatron's AI scribe is designed to enhance documentation accuracy and efficiency, it has some limitations:

- Al-generated content may contain errors, misinterpretations, or missing context that requires correction.
- Al does not replace human judgment and should not be relied upon for independent clinical decision-making.
- While Carepatron applies advanced security measures, no system is entirely immune to cybersecurity risks.
- Al models are trained on existing datasets and may reflect biases in language or clinical assumptions.

To ensure accuracy and compliance, your healthcare provider will always review and verify Algenerated documentation before finalizing your medical records.

Your rights regarding Al-assisted documentation

You have the following rights concerning the use of Carepatron's AI tools in your medical records:

- The right to be fully informed about how Carepatron's AI is used in your care.
- The right to ask questions and receive clarification about Al-generated notes.
- The right to opt out of Al-assisted documentation at any time.
- The right to request human-only documentation if you prefer.

If you do not consent to Al-assisted documentation, you may request traditional, non-Al documentation

by checking the box below or notifying your healthcare provider in writing.	
☐ I decline the use of AI in my medical documentation and request human-only documentation.	
Choosing to opt out will not affect your access to care in any way.	
	_
