What is Critical Thinking?

Critical thinking is like being a detective. It's when you ask questions, think carefully, and decide if something makes sense or not.

What is a Logical Fallacy?

A logical fallacy is like a trick in an argument. It's when someone tries to convince you of something by using reasoning that sounds good but is actually not strong or fair. Imagine someone saying, "You should eat ice cream for breakfast because all your friends do it." That doesn't make it a good idea, right? That's a logical fallacy!

Here's a list of the ones people often use:

Ad Hominem

Attacking the person instead of their argument.

Example: "You can't trust her argument on environmental policy because she drives a gasguzzling car."

Appeal to Authority

Believing something because a famous person said it.

Example: "This diet must be effective because a celebrity endorses it."

Bandwagon Fallacy

Thinking something is true because lots of people believe it.

Example: "Everyone is buying this brand of sneakers, so they must be the best."

False Dilemma

Saying there are only two choices when there are actually more.

Example: "You're either with us or against us."

Hasty Generalization

Making a quick judgment based on little or no evidence.

Example: "I met one rude person from that city, so everyone there must be rude."

Slippery Slope

Saying one small thing will lead to a big, bad result without proof.

Example: "If we allow students to chew gum in class, soon they'll be breaking all the rules."

Straw Man

Changing someone's argument to make it easier to attack.

Example: "If we allow students to chew gum in class, soon they'll be breaking all the rules."

Students may have different answers, but look for answers similar to these:

What is the message?

CHOCO Cereal is delicious and good for your health.

Who is delivering the message?

CHOCO Cereal brand or the CornSyrup Global company.

What do you know about the messenger's beliefs?

- The company sells cereal
- The company is named CornSyrup Global, so they may also sell corn syrup
- The company is for-profit because it is in the Fortune 500.

What will they gain if you believe in their message?

They will sell a lot of cereal

What observations have you made that make you question their message?

- The product is made of chocolate
- · The nutrition label says it has high calories and a lot of sugar
- The company uses corn syrup

Tell someone what you think (say, your parent or your friend), and try to convince them based on what you know.

This depends on the student's other answers; as long as they try to outline what they know in a way that is convincing and free of logical fallacies, it is valid. You can commend them if they include source.
