Use radio buttons for selecting answers:
1. Which gland is often called the "master gland" of the endocrine system?
☐ a) Thyroid gland
□ b) Pituitary gland
□ c) Adrenal gland
☐ d) Pancreas
2. Which hormone is responsible for regulating blood sugar levels?
a) Insulin
□ b) Thyroxine
☐ c) Cortisol
☐ d) Estrogen
3. Which disorder is characterized by an overactive thyroid gland?
a) Hypothyroidism
□ b) Hyperthyroidism
☐ c) Cushing's syndrome
☐ d) Addison's disease
4. What is the primary function of the hormone oxytocin?
a) Regulating growth and development
<ul><li>□ b) Stimulating milk production</li></ul>

		c) Controlling body temperature
		d) Promoting bonding and childbirth
5.	Wh	ich hormone is produced by the adrenal glands in response to stress?
		a) Growth hormone
		b) Thyroid-stimulating hormone
		c) Epinephrine
		d) Progesterone
6.	Wh	at is the main hormone responsible for the regulation of the sleep-wake cycle?
		a) Melatonin
		b) Estrogen
		c) Testosterone
		d) Human growth hormone
7.	Wh	ich condition is caused by an excess of growth hormone in adulthood?
		a) Gigantism
		b) Acromegaly
		c) Dwarfism
		d) Cushing's syndrome
8.	Wh	ich hormone is responsible for calcium regulation in the body?
		a) Parathyroid hormone
		b) Aldosterone
		c) Insulin
		d) Prolactin
9.	Wh	ich gland produces the hormone melatonin?
		a) Adrenal gland
		b) Pituitary gland
		c) Pineal gland
		d) Thyroid gland
10.	Wh	at is the primary function of the hormone progesterone?
		a) Regulating the menstrual cycle
		b) Stimulating muscle growth
		c) Maintaining blood glucose levels
		d) Controlling blood pressure

adrenal glands?			
a) Cushing's syndrome			
□ b) Addison's disease			
☐ c) Hypothyroidism			
☐ d) Hyperthyroidism			
12. Which hormone is responsible for stimulating the production of red blood cells?			
a) Follicle-stimulating hormone			
<ul><li>□ b) Thyroid-stimulating hormone</li></ul>			
☐ c) Growth hormone			
☐ d) Erythropoietin			
13. Which gland is responsible for producing insulin and glucagon?			
☐ a) Pituitary gland			
□ b) Thyroid gland			
□ c) Pancreas			
☐ d) Parathyroid gland			
14. What hormone is released during childbirth to stimulate contractions?			
☐ a) Oxytocin			
□ b) Progesterone			
□ c) Estrogen			
☐ d) Testosterone			
15. Which disorder is characterized by the body's inability to produce sufficient insulin?			
☐ a) Type 1 diabetes			
□ b) Type 2 diabetes			
☐ c) Hypoglycemia			
☐ d) Hyperthyroidism			
16. Which hormone is responsible for stimulating milk production in breastfeeding mothers?			
☐ a) Prolactin			
□ b) Thyroxine			
□ c) Cortisol			
☐ d) Epinephrine			

11. Which condition is characterized by insufficient production of cortisol by the

17. What hormone is responsible for stimulating the development of male secondary sexual characteristics?

☐ a) Estrogen			
□ b) Testosterone			
□ c) Progesterone			
☐ d) Thyroxine			
18. Which condition is characterized by an underactive thyroid gland?			
a) Hyperthyroidism			
□ b) Cushing's syndrome			
☐ c) Hypothyroidism			
☐ d) Acromegaly			
19. What hormone is released during periods of prolonged stress?			
□ a) Insulin			
□ b) Cortisol			
☐ c) Growth hormone			
□ d) Estrogen			
20. Which hormone regulates the body's metabolism?			
a) Thyroxine			
□ b) Prolactin			
c) Adrenaline			
☐ d) Progesterone
