## **Hoffman's Sign Test**

| Patient's full name:                                                                                                                                         |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Date examined:                                                                                                                                               |
| Physician's full name:                                                                                                                                       |
| What you need: two chairs                                                                                                                                    |
| Instructions:                                                                                                                                                |
| Have your patient sit down                                                                                                                                   |
| Tell them to relax the whole time                                                                                                                            |
| <ul> <li>Pick one of their hands and position it in a way that ensures the dorsiflexion at the wrist<br/>and the partial flexion of their fingers</li> </ul> |
| <ul> <li>Hold the patient's partially extended middle finger and stabilize the proximal joint using<br/>your index finger and middle finger</li> </ul>       |
| <ul> <li>Once their middle finger is in position, you need to perform a flick of your thumb (you</li> </ul>                                                  |
| must ensure that it makes contact with the nail of your patient's middle finger)                                                                             |
| The flick doesn't have to be too strong. It needs to be abrupt                                                                                               |
| Results:                                                                                                                                                     |
| Negative: no involuntary movement when the middle finger is flicked                                                                                          |
| Positive: the index finger and thumb flexed involuntarily                                                                                                    |
| Additional Comments:                                                                                                                                         |
|                                                                                                                                                              |
|                                                                                                                                                              |
|                                                                                                                                                              |
|                                                                                                                                                              |
|                                                                                                                                                              |
|                                                                                                                                                              |
|                                                                                                                                                              |
|                                                                                                                                                              |
|                                                                                                                                                              |
|                                                                                                                                                              |
|                                                                                                                                                              |
