INTERNAL CONTROL INDEX (ICI) INDEX INSTRUCTIONS

Please read each statement. Where there is a blank, decide what your normal or usual attitude, feeling, or behavior would be:
A = RARELY (less than 10% of the time)
B = OCCASIONALLY (about 30% of the time)
C = SOMETIMES (about half the time)
D = FREQUENTLY (about 70% of the time)
E = USUALLY (more than 90% of the time)
Of course, there are always unusual situations, in which this would not be the case, but think of what you would do or feel in most normal situations.
Write the letter that describes your usual attitude or behavior in the space provided on the response sheet.

Scoring:

Rarely = 5; Occasionally = 4; Sometimes = 3; Frequently = 2; and Usually = 1. The scoring is reversed for the following items: 3, 5, 7, 9, 10, 12, 13, 15, 16, 18, 20, 21, 25, and 28.

The ICI questions will give you a number in the range 28-140, with higher numbers indicating a more internal locus of control. The value 84 is the center of the scale, indicating neither an internal nor external LoC.

Values below 84 indicate a belief that your life is controlled more by external forces than yourself, and the lower the value, the stronger that belief in the power of external forces. Likewise, values above 84 indicate a belief that you are in control of your own life, with higher values indicating a stronger belief in your power.
