Karnofsky Performance Scale

Name:	Age:	Gender:
Examiner:	Date:	

Please tick the appropriate rating for your patient in terms of their capability to do activities of daily living while dealing with a serious medical illness or two.

Value	Level of functional capacity	Condition	
100%	No complaints; no evidence of disease	Able to carry on normal activity and to work. No special care is needed.	
90%	Able to carry on normal activity; minor signs or symptoms of disease		
80%	Normal activity with effort; some signs or symptoms of disease		
70%	Cares of self; unable to carry on normal activity or to do active work	Unable to work; able to live at home and care for most personal needs; varying amount of assistance is needed.	
60%	Requires occasional assistance but is able to care for most personal needs		
50%	Requires considerable assistance and frequent medical care		
40%	Disabled; requires special care and assistance	Unable to care for self; requires equivalent of institutional or hospital care; diseases may be progressing rapidly.	
30%	Severely disabled; hospital admission indicated although death not imminent		
20%	Very sick; hospital admission necessary; active supportive treatment necessary		
10%	Moribund; fatal processes progressing rapidly		
0%	Dead
