Domain	Criteria	Points		
Complement proteins	Low C3 OR low C4	3		
	Low C3 AND low C4	4		
SLE-specific antibodies	• Anti-dsDNA antibody* OR anti-Smith antibody	6		
Total score:				
Scoring and interpretation				
<ul style="list-style-type: none"> A score ≥ 10 points, with at least one clinical criterion and one immunologic criterion present, or biopsy-proven lupus nephritis with a positive ANA or anti-dsDNA, is considered diagnostic for systemic lupus erythematosus (SLE). A score < 10 points is not diagnostic for SLE, but the patient may still require monitoring or further evaluation for other autoimmune disorders or underlying conditions. <p>Note that while this scoring system can aid in the diagnosis of lupus, healthcare practitioners should also consider the patient's overall clinical picture, medical history, and any other relevant factors before making a final diagnosis.</p>
