Modified Oswestry Disability Index

Name:	Date:
Instructions: Please select the statement that best describes how your I below. Please carefully think about how your lower back feels and don't equestionnaire, submit this to your doctor/attending physician so they can	exaggerate your pain and discomfort. Once you've answered this
Section 1 – Pain intensity	Section 2 – Personal care (washing, dressing etc)
_	_
☐ I have no pain at the moment	I can look after myself normally without causing extra pain
The pain is very mild at the moment	I can look after myself normally but it causes extra pain
The pain is moderate at the moment	It is painful to look after myself and I am slow and careful
☐ The pain is fairly severe at the moment	I need some help but manage most of my personal care
The pain is very severe at the moment	I need help every day in most aspects of self-care
The pain is the worst imaginable at the moment	I do not get dressed, I wash with difficulty and stay in bed
Section 3 – Lifting	Section 4 – Employment/Homemaking
☐ I can lift heavy weights without extra pain	My normal homemaking/job activities do not cause pain.
☐ I can lift heavy weights but it gives extra pain	My normal homemaking/job activities increase my pain, but I
Pain prevents me from lifting heavy weights off the floor, but I can manage if they are conveniently placed eg. on a table	can still perform all that is required of me. ☐ I can perform most of my homemaking/job duties, but pain
Pain prevents me from lifting heavy weights, but I can manage light to medium weights if they are conveniently	prevents me from performing more physically stressful activities (eg, lifting, vacuuming).
positioned	Pain prevents me from doing anything but light duties.
I can lift very light weights	Pain prevents me from doing even light duties.
I cannot lift or carry anything at all	Pain prevents me from any job or homemaking chores.
Section 5 – Sitting	Section 6 – Standing
☐ I can sit in any chair as long as I like	☐ I can stand as long as I want without extra pain
☐ I can only sit in my favourite chair as long as I like	☐ I can stand as long as I want but it gives me extra pain
Pain prevents me sitting more than one hour	Pain prevents me from standing for more than 1 hour
Pain prevents me from sitting more than 30 minutes	Pain prevents me from standing for more than 3 minutes
Pain prevents me from sitting more than 10 minutes	Pain prevents me from standing for more than 10 minutes
Pain prevents me from sitting at all	Pain prevents me from standing at all
Section 7 – Sleeping	Section 8 – Walking
My sleep is never disturbed by pain	Pain does not prevent me walking any distance
My sleep is occasionally disturbed by pain	Pain prevents me from walking more than 2 kilometres
Because of pain I have less than 6 hours sleep	Pain prevents me from walking more than 1 kilometre
Because of pain I have less than 4 hours sleep	Pain prevents me from walking more than 500 metres
Because of pain I have less than 2 hours sleep	I can only walk using a stick or crutches
Pain prevents me from sleeping at all	I am in bed most of the time
Section 9 – Social life	Section 10 – Traveling
My social life is normal and gives me no extra pain	I can travel anywhere without pain
My social life is normal but increases the degree of pain	☐ I can travel anywhere but it gives me extra pain
Pain has no significant effect on my social life apart from	Pain is bad but I manage journeys over two hours
limiting my more energetic interests eg, sport	Pain restricts me to journeys of less than one hour
Pain has restricted my social life and I do not go out as often	Pain restricts me to short necessary journeys under 30
Pain has restricted my social life to my home	minutes
I have no social life because of pain	Pain prevents me from traveling except to receive treatment

Instructions

Please calculate the scores after your patient submits this index to you. Remember that the answers are arranged by severity. The scores are 0-5 per section.

If they pick the first statement among the six, that means they're fine and the score is 0.

If they pick the final statement, that means the pain is bad and is hindering them from doing the activity completely, so the score is 5.

Equation

The total score ÷ the total possible score (always 50) x 100. Here's an example:

- · The total score they got is 16.
- The total possible score is always 50.
- Then the equation is $16 \div 50 \times 100 = 32$.
- · The final answer is always a percentage, so it's 32% in this case

In the event that they willfully did not answer a section, you'll have to subtract 5 from the total possible score for each section they didn't answer, so the equation will change and it should look like this:

• 16 \div 45 (total possible score) x 100 = 35.5%

You may calculate here:

Total score: ÷ Total Possible Score: x 100 =

Score Ranges and Designations

0% to 20%: Minimal Disability

The patient can cope with most living activities. Usually, no treatment is indicated apart from advice on lifting, sitting, and exercise.

21%-40%: Moderate Disability

The patient experiences more pain and difficulty with sitting, lifting, and standing. Travel and social life are more difficult and they may be disabled from work. Personal care, sexual activity, and sleeping are not grossly affected and the patient can usually be managed by conservative means.

41%-60%: Severe Disability

Pain remains the main problem in this group but activities of daily living are affected. These patients require a detailed investigation.

61%-80%: Crippled

Back pain impinges on all aspects of the patient's life. Positive intervention is required.

81%-100%

These patients are either bed-bound or exaggerating their symptoms.
