Boston, MA, 02130

Dear VA Medical Center Team,

I am writing to you in my capacity as Consultant Neurologist

at City Health Neurological Center, This letter pertains to my patient,

John Deare, whom I have been treating since June 5, 2022.

My patient has a unique medical history that includes:
frequent migraines and dizziness.

In reviewing the specifics of John Deare's case, it is noted that his head injury caused by falling debris at a construction site on June 1, 2022

as documented in
work incident report and initial medical assessment

appears to be directly linked to the onset of their medical condition.

Based on my professional evaluation and the available medical evidence, I believe there is a direct
nexus between John Deare 's medical condition and
his head injury caused by falling debris at a construction site on June 1, 2022

The evidence supporting this opinion includes
the temporal correlation between the incident and the onset of symptoms,
the nature of his head injury, and medical literature on traumatic brain injuries.

In conclusion, it is my professional opinion that John Deare 's condition is
directly

related to

[Service, incident, or environmental factor]

As such, I recommend the following:
neurological monitoring, cognitive therapy, and appropriate symptom management to address his condition.

Please feel free to reach out to me at (555) 123-4567 or laura.simmons@cityhealth.org
if you require any additional information or clarification.

Sincerely,

Digital Signature
