Interpretation of Total Score		
<ul> <li>Score of 0-5: These scores generally do not suggest Rheumatoid Arthritis. Patients with these scores are less likely to be classified as having RA according to the ACR/EULAR criteria.</li> <li>Score of 6 or greater: A score of 6 or more is consistent with a diagnosis of Rheumatoid Arthritis. It suggests that the patient's clinical presentation aligns with the criteria established for RA, warranting classification as such.</li> </ul>
