

# Rorschach Inkblot Test for Thought Disorder

## Patient Information:

Full Name: **Emily Collins**

Date: **June 23, 2023**

Date of Birth: **April 18, 1989**

Identification Number: **EC67890**

---

## Instructions for the Patient:

This test involves a series of 10 unique inkblot images. The images will be shown to you one at a time. For each inkblot, you're required to share what you perceive the image to represent.

Please describe your interpretations as freely and thoroughly as possible. Your responses will be recorded and subsequently analyzed. After all the inkblots have been shown, you may be asked to elaborate on some of your interpretations.

The test usually takes between 45 minutes and an hour.

**Please Note:** There are no right or wrong answers in this test. It is designed to understand your perception and cognitive processes.

---

## Examiner's Notes and Patient Responses:

- Inkblot 1:** Emily perceived the image as a butterfly with detailed patterns on its wings. She seemed relaxed and engaged while describing it.
- Inkblot 2:** She saw two faces arguing with each other. Emily seemed slightly tense while sharing this interpretation.
- Inkblot 3:** Emily reported a disturbing image of a large creature with claws. She was notably anxious during this interpretation.

4. **Inkblot 4:** She identified an image of two children playing near a pond. Emily smiled and seemed nostalgic during this part of the assessment.
5. **Inkblot 5:** Emily interpreted this as a scary mask. Again, there was some apparent anxiety as she described it.

**Results:**

Emily displayed a thoughtful and reflective approach to the inkblots. Her creative and insightful interpretations were indicative of a broad range of thought processes. However, there were recurrent instances of anxiety, particularly around the third and fifth images. These may suggest underlying concerns or stressors.

---

**Additional Comments for the Patient:**

Emily, please ensure to allocate enough time to complete the test without rushing for future sessions.

It's recommended to take the test in a quiet, comfortable environment to allow for maximum focus and minimal distractions.

Feel free to reach out if you have any questions or need further clarification regarding any aspect of the test.
