

# Short Term Memory Loss Test

Patient information	
Name:	
Date of assessment:	
Assessor's name:	
Instructions	
<ul style="list-style-type: none"><li>• The patient will be given a series of tasks designed to assess short-term memory.</li><li>• Each task should be scored based on the patient's ability to recall information.</li><li>• Use the scoring system provided for each task.</li></ul>	
Task 1: Word recall	
<ul style="list-style-type: none"><li>• Present a list of 10 words to the patient.</li><li>• Allow the patient to study the list for 1 minute.</li><li>• After 5 minutes, ask the patient to recall as many words as possible.</li></ul>	
Words list	
1.	6.
2.	7.
3.	8.
4.	9.
5.	10.
Recalled words:	
Score (number of words correctly recalled):	
Task 2: Number sequences	
<ul style="list-style-type: none"><li>• Read a sequence of numbers to the patient at a rate of one number per second.</li><li>• Start with a 3-number sequence, gradually increasing up to 7 numbers.</li><li>• After each sequence, ask the patient to repeat the numbers in the same order.</li></ul>	
Sequence given:	
Sequence recalled:	
Score (number of sequences correctly recalled):	

### Task 3: Object recall

- Show the patient 5 common objects for 30 seconds.
- After a 3-minute interval, ask the patient to recall the objects.

Object shown:

Objects recalled:

Score (number of objects correctly recalled):

### Task 4: Story recall

- Read a short story or paragraph to the patient.
- After reading, ask the patient to recount as much of the story as they can.

Score (based on the amount and accuracy of details recalled):

### Overall score

### Assessor's observations and comments

Include observations about the patient's performance, any notable difficulties, and overall assessment of their short-term memory capabilities:
