Latex allergy

On medication for high blood pressure, runs in family

Past Dental Hx

No history of tooth extraction

Non-smoker

Brushes once daily with manual toothbrush

Avoids #30 when brushing due to gum sensitivity

History of tooth sensitivity when eating and sleeping

Objective

Clinical Exam

Gum inflammation and tartar build-up at #29-#32

Photographs taken and patient shown where tartar was built up

Gum slightly receded at #30 in accordance with natural progression of gum recession due to ageing

Radiology

Shadow in x-ray at tooth #31, indicative of cavity

Patient Identifier(If known): ABC123

Date: 11/17/2022

First Name: Alex

Surname: McQueen

DoB: 01/01/1980

Assessment

1. Gingivitis due to avoiding brushing sensitive area
2. Cavity at #31

Plan

Prescribed sensitive toothpaste for brushing and educated on increased need to brush twice daily and floss affected area

Removed tartar in the affected area

Follow-up appointment for filling for #31 in 5 weeks
