My overall temperament style is: _____

Interpretation

Mostly As - Sanguine

Those characterized as Sanguine tend to be outgoing, akin to an extrovert. They exhibit qualities that facilitate easy friendships and maintain optimism the majority of the time.

Mostly Bs - Choleric

Those with a choleric temperament possess traits that make them notably influential individuals. They are typically deeply committed and purposeful in their endeavors, positioning them naturally as leaders.

Mostly Cs- Melancholic

Individuals with a melancholic temperament tend to be serious and exhibit a slow response to others. By nature, they often prefer solitude and require a specific reason to engage in social interactions.

Mostly Ds - Phlegmatic

A phlegmatic temperament often manifests in a strong inclination to avoid conflicts. Their service-oriented approach tends to position them as passive figures in various settings, be they positive or negative. These individuals usually lack high ambition and a sense of urgency, largely due to their passive disposition.
