

Underarm Temperature Chart

Name: Willy Freeman

Date: December 2, 2023

Age: 15

Gender: M

| Age Group | Average Temperature (°F) |
|---------------------------|--------------------------|
| Infants (0-1 year) | 97.5 - 99.3 |
| Children (2-10 years) | 97.2 - 99.0 |
| Adolescents (11-17 years) | 96.6 - 98.0 |
| Adults (18-60 years) | 97.8 - 99.0 |
| Elderly (> 60 years) | 96.4 - 98.3 |

Temperature:

99.2 F

Additional Notes:

No immediate cause for concern as the temperature is only slightly elevated and may be influenced by external factors or mild physical activity prior to the reading. Recommended to monitor for any additional symptoms or further increase in temperature. Advise patient to rest and stay hydrated. If the temperature persists above 99°F or other symptoms develop, further evaluation may be necessary
