Dear VA Medical Center Team,

I hope this letter finds you well. I am writing on behalf of Tom Nook, a veteran who is seeking disability benefits from the Department of Veterans Affairs. I am a Consultant Neurologist at New Horizons Hospital, I have had the privilege of providing medical care and support to Tom Nook.

My patient has a unique medical history that includes:  
chronic migraines and seizure disorder

Over the course of our medical interactions, I have carefully reviewed the patient's medical records including the following:  
service treatment records and DD214 form

I am writing to express my professional opinion that the following conditions are directly related to the patient's military service:  
chronic migraines and seizure disorder

In my assessment, these conditions are more likely than not associated with the patient's military service. This is based on a thorough evaluation of the available evidence:  
onset of symptoms during service, a noted increase in frequency and severity following head trauma, and corroborating studies linking similar injuries to these conditions

If these conditions are indeed linked to Tom Nook's military service, it is my recommendation that they warrant a disability rating of 70%.

In closing, I want to emphasize that my assessment is based on a comprehensive review of Tom Nook's medical history and service records. I firmly support my patient's claim for disability benefits, and I believe that the evidence strongly supports this.

Please feel free to reach out to me at (555) 123-4567 or isabelle@newhorizons.com if you require any additional information or clarification.

Sincerely,  
Dr. Isabelle Leaf
