

Videonystagmography (VNG) Testing

Name:	Age:
Date:	Gender:

Please answer the following questions to the best of your ability. Your answers will help us determine if you are a good candidate for a Videonystagmography (VNG) test.

Question	Answer Options	Interpretation
1. Have you been diagnosed with a vestibular or balance disorder?	<input type="checkbox"/> Yes <input type="checkbox"/> No	If the answer is yes, the VNG test may be helpful in further evaluating the condition.
2. Have you experienced any of the following symptoms in the past 6 months: dizziness, vertigo, spinning sensations, lightheadedness, nausea, or vomiting?	<input type="checkbox"/> Yes <input type="checkbox"/> No	If the answer is yes, the VNG test may help identify the cause of the symptoms.
3. Have you recently had any changes in hearing, such as ringing in the ears or muffled hearing?	<input type="checkbox"/> Yes <input type="checkbox"/> No	Changes in hearing can be indicative of an inner ear disorder, which may be evaluated with a VNG test.
4. Have you had any recent head injuries or concussions?	<input type="checkbox"/> Yes <input type="checkbox"/> No	Head injuries can affect the functioning of the inner ear and vestibular system, which may be evaluated with a VNG test.
5. Are you taking any medications that may affect your balance or vision?	<input type="checkbox"/> Yes <input type="checkbox"/> No	Certain medications, such as those for motion sickness or anxiety, can affect the results of a VNG test.
6. Do you have any conditions that may make it difficult to perform certain movements or positions, such as neck problems or joint pain?	<input type="checkbox"/> Yes <input type="checkbox"/> No	The healthcare provider may need to modify the VNG test procedure based on any physical limitations.
7. Have you ever experienced any symptoms of migraine, such as headaches, sensitivity to light or sound, or visual disturbances?	<input type="checkbox"/> Yes <input type="checkbox"/> No	Migraine can be associated with vestibular symptoms and may be evaluated with a VNG test.
8. Have you ever been diagnosed with a neurological condition, such as multiple sclerosis or Parkinson's disease?	<input type="checkbox"/> Yes <input type="checkbox"/> No	Certain neurological conditions can affect balance and coordination and may be evaluated with a VNG test.
9. Have you ever undergone any ear surgeries or procedures, such as a cochlear implant or ear tube insertion?	<input type="checkbox"/> Yes <input type="checkbox"/> No	Ear surgeries can affect the functioning of the inner ear and vestibular system, which may be evaluated with a VNG test.
10. Do you have a history of anxiety or panic attacks?	<input type="checkbox"/> Yes <input type="checkbox"/> No	Anxiety and panic attacks can sometimes cause dizziness or other vestibular symptoms, which may be evaluated with a VNG test.

The answers to these questions will help the healthcare provider determine if a VNG test is appropriate for the patient and whether any modifications to the test may be necessary based on the patient's individual circumstances.
