

Yocum Test

Patient's Name: _____ Date: _____

Examiner's Name: _____

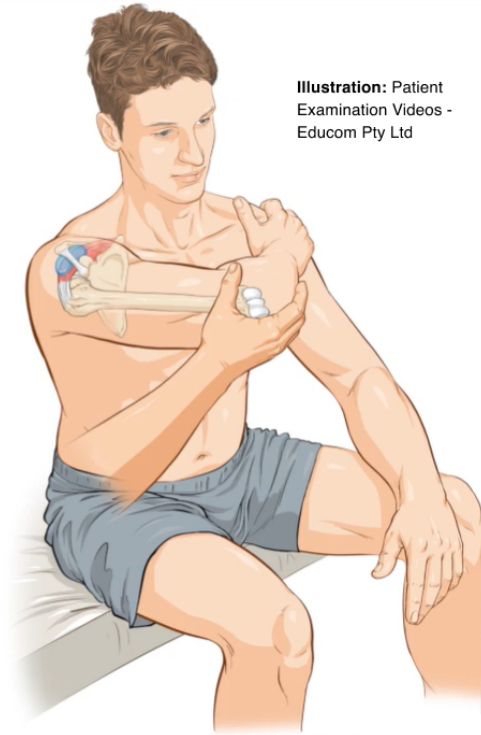

Illustration: Patient Examination Videos - Educom Pty Ltd

Instructions:

1. Have your patient in a sitting position.
2. Ask the patient to place the hand on the affected side on the shoulder of the unaffected side (opposite shoulder).
3. Ask them to elevate the elbow.

Test Result:

Positive test if:

- The patient is hesitant to follow any of the instructions
- The patient feels pain when the elbow is elevated.

Patient Results:

- Positive
- Negative

Additional Notes:
